**SAMINCO SIGNS SERVICE PARTNER AGREEMENT WITH DANFOSS**  
*For Service Partner Network*

**Fort Myers, FL:** Saminco is proud to announce that we are now an authorized Danfoss Service Partner for the VLT<sup>®</sup> and Vacon<sup>®</sup> brands of VFD's, as well as DrivePro<sup>®</sup> service solutions.

As a Medium Voltage Partner, we offer liquid cooled modular medium voltage drives for industrial and water/wastewater applications. Our team works closely with customers to design and install a system for the exact needs of their applications.

As a Danfoss DrivePro<sup>®</sup> service provider, we are able to offer services beyond the basic troubleshooting, repair, replacement and maintenance. Life cycle services include warranty coverage, preventative maintenance, retrofit, start up, remote expert support, and more.

We are pleased to partner with Danfoss to add these products and services to the full Saminco line.
